SUMMARY

Data Analyst and aspiring Data Scientist with a strong academic background in Applied Statistics and Data Science, currently pursuing an M.Sc. at the University of Dhaka. Experienced in statistical analysis, machine learning, causal inference, and data management using large scale survey and real world datasets. Proficient in R, Python, SQL, STATA, SPSS, Power BI, and Excel, with hands-on experience in data cleaning, exploratory data analysis, statistical modeling, predictive modeling, data visualization, and dashboard development. Developed an R package and interactive Shiny application for causal machine learning analysis and simulation. Strong interest in data driven problem solving, predictive analytics, and evidence based decision making.

EDUCATION

Institute of Applied Statistics and Data Science (Formerly ISRT), University of Dhaka Dhaka, Bangladesh
Master of Science (M.Sc.) in Applied Statistics and Data Science Dec. 2025 – Present

- **Relevant Coursework:** Causal Inference, Machine Learning, Big Data Analytics, Bayesian Statistics, Longitudinal Data Analysis, Statistical Signal Processing, Spatial Statistics, Python

Institute of Applied Statistics and Data Science (Formerly ISRT), University of Dhaka Dhaka, Bangladesh
Bachelor of Science (B.Sc.) in Applied Statistics Jan. 2022 – Dec. 2025

- **Relevant Coursework:** Regression Analysis, Time Series Analysis, Statistical Inference, Research Methodology, Multivariate Analysis, PCA, FA, Clustering, Classification, Survival Analysis, Sampling Design, Epidemiology, Population Studies & Demography, R, SQL
- **Result:** 3.75 / 4.00

TECHNICAL SKILLS

Programming Languages : R, Python, SQL

Data Analysis & Statistical Computing : tidyverse, dplyr, NumPy, pandas, SciPy, statsmodels

Data Visualization & Business Intelligence : Microsoft Power BI, Looker Studio, Shiny, ggplot2, matplotlib, seaborn

Databases & Data Warehousing : PostgreSQL, Google BigQuery, SQL

Tools : Microsoft Excel (Advanced), Google Sheets (Advanced), STATA, SPSS, LaTeX, R Markdown

RESEARCH EXPERIENCE

MS Thesis (In Progress)  Dec. 2025 – Present

Estimating the Causal Effect of Higher Education on Antenatal Care (ANC) Utilization with Sensitivity Analysis Using Machine Learning Methods

- Estimated the causal effect of maternal higher education on ANC utilization using BDHS 2022 data.
- Applied BART, Causal Forests, Causal Additive Forests, Causal MARS, and Causal Boosting for causal effect estimation.
- Used Parametric Standardization as a benchmark and evaluated methods through simulation studies.
- Conducted sensitivity analysis for unmeasured confounding and heterogeneous treatment effects.

BS Project  Oct. 2024 – May 2025

Assessing the Risk Factors of Under-Five Child Mortality: A Study Based on BDHS 2022

- Analyzed 8,800+ observations from the Bangladesh Demographic and Health Survey (BDHS 2022) using R and STATA.

- Applied multilevel logistic regression, hypothesis testing, and exploratory data analysis to identify key determinants of under-five mortality.
- Developed predictive models with excellent discrimination performance (AUC = 0.91).
- Created statistical visualizations and reports to support evidence based decision making.

SELECTED PROJECTS

causalML – R Package

Causal Machine Learning and Sensitivity Analysis

- Developed an R package for causal effect estimation using Causal Forest, BART, Causal Boosting, Causal MARS, and Causal Additive Forest methods.
- Implemented simulation tools, model comparison, ATE/CATE estimation, and sensitivity analysis functionality.

causalML – Shiny

Interactive Causal Machine Learning Analysis Platform

- Developed an interactive Shiny application for data preparation, simulation studies, causal model comparison, ATE and CATE estimation.
- Integrated multiple causal machine learning methods into a user friendly interactive interface.

Sales BI Dashboard – Shiny

Interactive Sales Analytics and Business Intelligence Dashboard

- Developed an interactive Business Intelligence dashboard using R Shiny for analyzing sales performance, business KPIs, products, regions, customers, and salespersons.
- Implemented interactive filters, KPI cards, sales trend analysis, product and regional performance analysis, customer insights, and transaction level data exploration.
- Integrated automated report and visualization download features to support business reporting and decision making.

ONLINE COURSES & CERTIFICATIONS

- **Data Analysis with Python** freeCodeCamp (Dec. 2025) 
- **Data Science Certificate Program** Ostad (Feb. 2025) 
- **Data Analyst Job-Ready Bootcamp** Datasolution-360 (Aug. 2025) 
- **SQL for Data Analysis** Dataskool (Dec. 2023)
